

TPMS

Gussin TPMS Relearn Procedure A0036

Sensor Relearn Procedure with a scan tool

Manual Relearn Procedure:

01. Engage parking brake and inflate all tires
02. Turn ignition to OFF position
03. Press and release brake pedal
04. Quickly turn the ignition from OFF to RUN (engine OFF) three times (stop in RUN position)
05. Press and release brake pedal
06. Turn ignition OFF
07. Quickly turn the ignition from OFF to RUN (engine OFF) three times (stop in RUN position)
- NOTE: all of the steps for this process must be performed within 10 seconds
08. A single horn chirp will indicate the relearn mode is active
09. Use tool to activate LF sensor
10. Single horn sounds to indicate sensor learning successful
11. Repeat for RF/RR/LR tires
12. TRAINING MODE COMPLETE will display on message center when relearn is finished

Tip: Lowering driver's side window may help to complete this process on larger vehicles

With push Button Start:

IMPORTANT NOTE: Some models require the start button to be pressed 2x (w/o pressing the brake) to enter RUN model (Ignition ON/Engine OFF). If that is the case modify steps 3 and 5 as noted.

01. Engage parking brake and inflate all tires
02. With the vehicle OFF press and release the brake pedal
03. Push START button 5 times (NOTE: 8 times if 2x-to-RUN)
04. Press and release the brake pedal
05. Push START button 6 times (NOTE: 9 times if 2x-to-RUN)
06. A single horn chirp will indicate the relearn mode is active
07. Use tool to activate LF sensor
08. Single horn sounds to indicate sensor learning successful
09. Repeat for RF/RR/LR tires
10. TRAINING MODE COMPLETE will display on message center when relearn is finished

Tip: Lowering driver's side window may help to complete this process on larger vehicles

Auto-Relearn Procedure:

01. Confirm TPMS sensors are properly installed
02. Adjust tire pressures to placard value
03. Drive vehicle for up to 20 minutes above 15mph or until TPMS light is off
